Education

. Bachelor of Technology in Computer Science and Engineering 2023-27

VIT Bhopal University, Bhopal CGPA: 8.91

. Intermediate (Class XII) 2021-22

Dr. Jagannath Mishra College , Muzaffarpur, Bihar Percentage: 78.2

. Matriculation (Class X) 2019 -20

Disha Delphi Public School, Kota , Rajasthan Percentage: 83.6

Personal Projects

Real-Time Collaboration Platform

A responsive web platform to connect team members and manage projects efficiently, enabling seamless communication and task coordination for hackathons.

- Developed intuitive front-end using JavaScript, HTML, and CSS, creating reusable UI components for real-time collaboration features.
- Ensured scalability by designing modular, maintainable code, adhering to modern UX patterns for enhanced user experience.
- Evaluated front-end libraries to balance performance and functionality, demonstrating ability to assess tool trade-offs.
- Led implementation of best practices for cross-browser compatibility and responsive design.
- Conducted iterative testing to validate UI functionality and accessibility. Tech Stack: JavaScript, HTML, CSS, Python, Flask

Hospital Resource Management Platform

A full-stack platform to optimize hospital resource allocation and predict appointment no-shows using machine learning, with a focus on user-friendly front-end design.

- Built responsive front-end with JavaScript, HTML, and CSS, creating reusable UX components for admin and client modules.
- Designed scalable front-end architecture integrated with Node.js and Express.js for dynamic user interactions.
- Evaluated front-end tools to address ambiguous requirements, iteratively refining UI based on user feedback.
- Implemented automated browser testing to ensure robust performance across devices, aligning with modern UX standards.
- Applied Python for backend logic, including logistic regression for no-show predictions and reinforcement learning for resource allocation.
Tech Stack: JavaScript, HTML, CSS, React, Node.js, Express.js, Python, SQL.

CERTIFICATIONS :

Deloitte Australia Data Analytics Job Simulation on Forage - July 2025

- Completed a Deloitte job simulation involving data analysis and forensic technology.
- Created a Dashboard using Tableau.
- Used Excel to classify data and draw business conclusions.
- Certificate link: [Data analytics Job simulation](#)

Deloitte Australia Technology Job Simulation on Forage - July 2025

- Completed a job simulation involving development and coding.
- Certificate link: [Technology Job Simulation](#)

NPTEL Certification in Cloud Computing (Elite Grade)

- Completed an in-depth course on cloud computing through NPTEL, achieving an Elite Grade. Gained expertise in cloud-based architectures, deployment models, and scalable system design, enhancing ability to develop and deploy robust front-end applications in distributed environments

Machine Learning with Python – Coursera

- Completed: December 2025
- Skills: Scikit-Learn, Regression, Classification, Clustering, Model Evaluation.
- Certificate link: [Coursera Machine learning certificate](#)

TECHNICAL SKILLS

Languages: C/C++, Python, Java, Javascript, HTML+CSS

Libraries : C++ STL, NumPy, Pandas, Scikit-learn,matplotlib.

Web Dev Tools: VScode, Git, Github

DevOps & Cloud Tools: Git, GitHub, VS Code

Frameworks: Flask,ReactJS

Cloud/Databases: Relational Database(MySQL)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming,Database Management System, Software Engineering.

Areas of Interest: DevOps, Cloud Engineering, Web Development, Machine Learning.

Soft Skills: Adaptability, Communication, Teamwork, Attention to Detail
